

Concrete Operational

Micro synopsis

Germany Germany escaped a world that turned from the pursuit of greatness to the pursuit of celebrity, the pursuit of fame. Now, hiding from a planet that is absorbed, encapsulated and completely loyal to The Benefit and their show, Germany and the others on their island struggle for survival and understanding of what went wrong, and how they can possibly change things.

Richard Vortigern is a man at the pinnacle of the universe. He and his brethren, The Universal Negotiators, have settled and pacified mankind, the human race has come to a languid state, but Richard sees an end befitting of mankind's timeless struggle. He enacts a plan, one that will span the course of eons of human history and turn humanity into children of the stars, an ultimate super being.

Richard's plan needs someone, it needs a man, it needs one of times greatest hero's to ensure its success, it needs one man that changed things before, one man with more fire and rage in his being than any other, it needs Germany Germany.

Time, fate, causality, love, fear, might and the power of will cross as Richard puts in motion his plan and Germany Germany comes to understand the nature of the universe, of time, of being, in this unrelenting look into the human condition and why we are all here.
